## ! Warning

Thank you for purchasing our UT257A/UT223A Superlarge Caliber Leakage Clamp Meter/Super Large Caliber Big Current Meter, in order to better use of this product, be sure to:
----To read this user manual carefully.
----Comply strictly with safety rules and precautions set out in this manual.

- Pay special attention to safety under any circumstances while using the instrument.
- Take note of the label text and symbols on the panel and back of the instrument.
- Keep the clamp clean and maintain regularly.
- Please don't place and store the instrument at the place with high temperature, humidity, moisture condensation and straight sunlight for a long time.
- Replace battery in time when the battery voltage is low.
- Remove or replace the battery if you expect not to use the instrument for a long time.
- Take note of the polarity when replace the battery.
- The operation, demolition, calibration and maintenance of the instrument must be carried out by qualified personnel authorized to do so.
- The meter should be stopped from being used immediately and sealed if danger is brought up in case of continued use; only a competent body can be authorized to deal with it.
- " $\triangle$ " in the manual is the safety warning sign, the contents of this manual must be followed for safe operation.
- "园" and other safety signs, the contents of this manual must be followed for safe operation.

## I. Introduction

## UT257A series of Super large Caliber Leakage

 Clamp Meter /Super Large Caliber Big CurrentMeteris well designed and manufactured for measuring AC leakage current, current, voltage, adopt the latest CT technology and digital integrated technology. Its large caliber $108 \mathrm{~mm} \times 148 \mathrm{~mm}$ can clamp electric cable of 108 mm diameter, or 160 mm $\times 4 \mathrm{~mm}$ flat cable and steel earth wires. Particularly suitable for leakage current measurement of cable and transformer earth steel.
Full automatically and LCD display, all the data are displayed in the screen, which is very clear and convenient. The meter is widely used in electric power, communication, meteorology, railway, oil field, architecture, measuring, teaching research unit, industrial mining enterprises, etc.
UT257A series of Superlarge Caliber Leakage
Clamp Meter's clamp core is made of special alloy,
adopt the latest magnetic shielding techniques, to ensure the high precision, high stability and high reliability of perennial uninterrupted measurement. The meter can store 99 sets of data, with RS232 interface, upload stored data to the computer through the system software, implementing online real-time monitoring, historical inquires, dynamic display. With the function of historical data read, preserve, print, and backlight, data hold, etc. It is a necessary tool for electrical safety testing.

## II. Model

| Model | Range | Resolution | Data Storage | Clamp Size | Note |
| :---: | :---: | :---: | :---: | :---: | :---: |
| UT257A | AC 0.0mA- 3200A | 0.1 mA | 99 sets | $108 \times 148 \mathrm{~mm}$ | Measure leakage <br> current |
|  | UT223A | AC 0.0A- 4000A |  |  | Measure big current |

## III. Electrical Symbols

| 囷 | Extremely dangerous! The operator must strictly abide by the safety rules; otherwise there is risk of <br> electric shock, resulting in bodily injury or fatalities. |
| :---: | :--- |
| $\mathbf{A}$ | Dangerous! The operator must strictly abide by safety rules; otherwise there is risk of electric shock, <br> resulting in bodily injury or fatalities. |
| $\mathbf{~}$ | Warning! Safety rules must be strictly abided by, otherwise personal injury or equipment damage <br> may be caused. |
| $\sim$ | Alternate Current (AC) |
| $\mathbf{-}$ | Direct Current(DC) |
| $\square$ | Double Insulation |

## IV. Technical Specification

| Function | Measure AC leakage current, big current (particularly suitable for leakage current <br> measurement of cable and transformer earth steel) |
| :--- | :--- |
|  | 6V DC (LR6 $\times 4$ alkaline dry batteries, continuously working for 12 hours) |
| Test Mode | Clamp CT, integral mode |
| Clamp Size | $108 \mathrm{~mm} \times 148 \mathrm{~mm}$ (can clamp electric cable of 108 mm diameter, or $160 \mathrm{~mm} \times 4 \mathrm{~mm}$ <br> flat cable and steel earth wires) |
|  | UT257A: AC $0.0 \mathrm{~mA} \sim 3200 \mathrm{~A}$ |
|  | UT223A: AC $0 . \mathrm{A} \sim 4000 \mathrm{~A}$ |
| Resolution | UT257A: AC 0.1 mA |
|  | UT223A: AC 0.1 A |
| Measurement Accuracy <br> $\left(23{ }^{\circ} \mathrm{C} \pm 3^{\circ} \mathrm{C}\right.$, below <br> $70 \%$ AC $0.0 \mathrm{~mA} \sim 499 \mathrm{~A} \quad \pm 2 \% \pm 5 \mathrm{dgt}$ <br> at the centeasured wire <br> clamp) | AC $500 \mathrm{~A} \sim 999 \mathrm{~A} \quad \pm 3 \% \pm 5 \mathrm{dgt}$ |
|  | AC $1000 \mathrm{~A} \sim 2999 \mathrm{~A} \quad \pm 4 \% \pm 5 \mathrm{dgt}$ |
| Measured Wire Position | AC $3000 \mathrm{~A} \sim 4000 \mathrm{~A} \quad \pm 5 \% \pm 5 \mathrm{dgt}$ ( Only UT223A) |

| Data Storage | 99sets, "FULL" symbol indicate the memory is full |
| :--- | :--- |
| RS232 Interface | With RS232 interface, download data to computer for analysis and management |
| Communication Wire | RS232 communication wire, 1.8 m |
| Frequency | $50 \mathrm{~Hz}, 60 \mathrm{~Hz}$ automatic identification |
| Gear Shift | Automatic shift |
| Sample Rate | About 2 times/second |
| Line Voltage | Below AC 600V line measurement |
| Display Mode | 4 digital LCD display, length $47 \mathrm{~mm} \times$ width 28.5 mm |
| Meter Size | Length 350mm $\times$ Width $180 \mathrm{~mm} \times$ Height 55 mm |
| Backlight | Suitable for dim places |
| Data Hold | " HOLD " symbol appears |
| Overflow | "OL" symbol appears |
| Automatic Shutdown | Automatic ally shutdown about 5 minutes after power on to reduce battery consumption |
| Voltage Detection | Low battery symbol " E "" appears to remind the replacement of battery when the <br> battery voltage drops below 5.2 V. |
| Weight of Meter | 1.5 kg (with batteries) |
| Weight of Package | 3 kg (with accessories) |

| Working Temperature <br> and Humidity | $0^{\circ} \mathrm{C} \sim 40^{\circ} \mathrm{C}$; below $80 \%$ rh |
| :--- | :--- |
| Storage Temperature <br> and Humidity | $-10^{\circ} \mathrm{C} \sim 60^{\circ} \mathrm{C}$; below $70 \%$ rh |
| Insulation strength | AC $3700 \mathrm{kV} / \mathrm{rms}$ (between core and shell) |
| Safety Specifications | IEC1010-1, IEC1010-2-032, 2 class of pollution, CAT III(600V) |

## V. Instrument Structure

1. Clamp ( $108 \mathrm{~mm} \times 148 \mathrm{~mm}$ )
2. Lock switch (after lock, the clamp can't be open)
3. HOLD key
4. PEAK key
5. LCD display
6. RS232 interface
7. Opening lever
8. POWER key
9. Battery cover
10. Battery cover screw (1 piece)
11. Up and down cover connecting screws (6 pieces)

## VI. LCD Display

(1). PEAK measurement mode symbol
(2). Symbol of low battery \& voltage (display when below 4.8 V )
(3). Symbol of data storage
(4). Symbol of data access
(5). 2-digital No. of data storage unit

(6). Current unit (mA or A)
(7). Data lock symbol
(8). Metrication decimal point
(9). 4-digital LCD figures display
(10). Symbol of AC

## VII. Method of Operation

## 1. Switch On/Off

Press POWER key to switch on, LCD display, in test mode, press POWER key to switch off. The meter will automatically power off after booting 5
minutes later. If LCD display is darker, maybe the battery voltage is too low, please replace batteries.

In data hold mode, firstly press HOLD key to cancel the lock, then press POWERkey to switch off.

## 2. Data Hold/Storage

In test mode, press HOLD key to lock currently displayed value and display "HOLD" symbol. At the same time, this locked value as a set of data followed by auto-ID and store, and "MEM" symbol flash one time. The meter can store 99 sets of data. If the memory is full, display "FULL" symbol.

## 3. Data Access/ Exit

In test mode, press PEAK and POWER key to access data inquiry form group "R: 01", and display "MR" symbol. Press PEAK or POWER key to increase or decrease the page number, it will automatically return back to group 01 when access the last group.

Press HOLD key to exit date inquiry, back to test mode.

## 4. Data Upload

Connecting the meter and computer with USBRS232 communication line attached in package. Start up the meter, run software, choose history access, then read, save, report, print history data, etc. The more data storage, take the longer time to read it. Historical data can be saved in Txt text or Excel format.

## 5. Delete Data

In the date inquiry mode, press PEAK and POWER key to delete all the stored data, and return back to test mode. At the same time, "dEL" symbol display.

## 6. General Measurement

During the measurement, the LCD real-time display the value of measured current and leakage current, the value displayed on LCD change with different current and leakage current. No measured value reserved when take the meter away from measured wires, LCD display zero.

High voltage, very dangerous! Only qualified personnel after training could conduct operation on it. The operator should obey safety regulations; Otherwise there will be the danger of electric shock resulting in personal injury or casualty.
Dangerous! Can not be used to test voltage
A higher than 600 V . Otherwise there will be the danger of electric shock resulting in personal injury or casualty.
Make sure the clamp well closed when measuring leakage current and current.
Make sure the measured wire at approximately the geometric center of the clamp.
Clean the clamp after finishing measurement, regularly maintain the meter.
Clamp live wire and null line together to measure leakage current of electric equipment. (Note: 2 wires)

Clamp earth wire to measure grounding line leakage current of electric equipment.
(Note: single wire)
Clamp four wires of there phase to measure the total leakage current. ( Note: 4 wires)
Clamp main line to measure total current of that main line. (Note: single wire)

In HOLD mode, press HOLD key to return back test mode. In data access mode, press HOLD key to exit data access, return back to test mode. In PEAK mode, press PEAK key to exit PEAK mode, return back to test mode. After deleting data, it will automatically return back to test mode.

## 7. PEAK Measurement

The maximum current measurement, during measurement, the meter can automatically compare the changed current, and keep the maximum one. When take the meter away from the measured wire, the measured value can also be kept, so this mode is suitable for the measurement in places where is not easily to read the value displayed on LCD. In general test mode, press PEAK key to access or exit PEAK test mode. " $\alpha$ ) ) " symbol displays in PEAK measurement mode. In other mode, should first exit and return back to test mode, and then operate PEAK measurement as above steps.

## VIII. Battery Replacement

Warning! Make sure the battery cover is well closed before measurement, otherwise there will be danger.
Take note of the battery polarity, otherwise it may cause damage to the instrument.
If the battery power is not enough, please change in time.
Take out the batteries if you expect not to use the meter for a long time.

1. " $\mid+$ " " is displayed when the power voltage is lower than 5.2 V , indicating that the battery should be replaced.
2. Press POWER key,make sure the meter is power off. Loosen the battery cover screw, open the plate, replace new batteries and cover the plate, then tighten screw.
3. Press POWER key to check whether the batteries are successfully replaced, repeat step 2 if it doesn't work.

## LNH:

## IX. Accessories

| Main Unit | 1 piece |
| :---: | :---: |
| Meter Box | 1 piece |
| RS232 Data Line | 1 piece |
| Disk | 1 piece |
| Battery | 4 pieces(Alkaline Dry Battery LR6) |
| User Manual | 1 piece |
| Guarantee Card | 1 piece |
| Certification | 1 piece |
